

ToolingShuttle 30
Mobile Quick-Change Unit for CrimpCenter Series

OPTIONS

ToolingShuttle 30

Concept

The ToolingShuttle 30 combines the crimp applicator (tooling), terminal reel and paper winder into one mobile quick-change unit for CrimpCenter 3x series fully automatic crimping machines. The ToolingShuttle 30 allows the operator to exchange all three elements simultaneously which significantly reduces changeover time. The ToolingShuttle 30 can be prepared for the next job at an external workstation while the CrimpCenter machine is in production thereby minimizing machine downtime. Once in position, the applicator is quickly moved from the ToolingShuttle 30 and secured into the crimping station. The ToolingShuttle 30 accepts most standard crimping tools (mini-style applicators), so existing applicators can be easily integrated.

Plug & Crimp™ Technology

Innovative Plug & Crimp™ technology lets operators exchange ToolingShuttles on CrimpCenter series machines in the shortest possible time – without any additional tools. The ToolingShuttle 30 is a sturdy lightweight unit equipped with 2 wheels and a handle for optimum maneuverability.

Options

- ShuttleRack: mobile storage rack for up to 5 ToolingShuttle 30 units
- Automatic barcode identification of individual ToolingShuttle 30

| Technical Specifications | |
|--------------------------|---|
| Length | 660 mm (26.0") (with terminal reel)* |
| Width | 140 mm (5.5") |
| Height | 1,107 mm (43.5") (with crimp applicator)* |
| Weight | Base frame: 7 kg (15 lbs) Fully equipped: 12 kg* (25 lbs) |
| CE – conformity | The ToolingShuttle 30 fully complies with all CE and EMC equipment guidelines relative to mechanical and electrical safety and electromagnetic compatibility. |
| Important note | Schleuniger recommends that samples be submitted in cases where there is doubt as to processing capabilities of a particular machine. |

* Dimensions and weight may vary depending on type of crimp applicator, terminal reel and paper winder.
